

So hard to say goodbye

It's really hard to say goodbye
But life teaches the absence of choice
More complicated, but still want to
know why?
Turn to old recordings, just to hear
your voice.....

You're presence is something we'll
miss
About how you made us laugh
At Family functions, we'll reminisce
Lookin at albums from our past

I remember thinkin my cousin is rich!
The Fast cars, booming system n
money I'll never forget.
The long conversations about life, the
hustle and the regrets.....

It matters not when time began
Or for us when it will cease
While you were here, you used it all
And now you rest in peace....

Death is certain n life is surely not
But You did everything you loved fam
Now you're our angel on high, up top
Shining down on us from above fam

The memories we have are immortal
So with them we'll never part
God carries you in his arms
We carry you in our hearts.....

Our family feels broken
Things might not ever be the same
But when God took from us
He reunited you with family again....
